

LAB 1

Add the necessary code to the end of the source file ***Realtor1.py*** so that the formatted output for the seller, price, cost, and commission will be correctly displayed.

Sample runs are shown below.

Sample 1

This program calculates the cost to sell a home
and the commission paid to an individual sales agent.

The user is asked for the last name of the seller and the
sales price.

Please enter the owner's last name: Johnson
Please enter the sales price of the home: 100000

Home Owner	Price of Home	Seller's Cost	Agent's Commission
Johnson	*****100000.00*****	*****6000.00*****	*****1500.00

Sample 2

This program calculates the cost to sell a home
and the commission paid to an individual sales agent.

The user is asked for the last name of the seller and the
sales price.

Please enter the owner's last name: Doe
Please enter the sales price of the home: 250

Home Owner	Price of Home	Seller's Cost	Agent's Commission
Doe	*****250.00*****	*****15.00*****	*****3.75

Make sure to upload your source file to directory ***labs/1***

Once your lab is uploaded and while logged into the server via a terminal session, traverse to the directory ***labs/1***. YOU MUST BE IN DIRECTORY ***1***, TO SUBMIT YOUR LAB.

Once you are ready to submit your lab issue the command ***submit csc157abc 1*** where *abc* is the course section number.
